

POR profile HS cover

Basic info

INSTALLATION OF LED LIGHTING SYSTEMS IN STANDARD HANDRAILS, SIMPLE DESIGN, FAST INSTALLATION. The POR profile is designed to mount LED lighting in handrails and balustrades. Suitable for steel, stainless steel, or aluminium. Installation of the fixture is performed with the use of the mounting insert which is hidden inside the railing. This allows the dismantling of the POR profile. It is carried out by levering the flanges of the fixture on both sides directly where the inserts are located. Removing the fixtures may cause it to deform. In outdoors applications, the POR fixtures should be supplied with watertight LEDs or should be sealed. Holes should be drilled in the railings to allow water to drain.
