

KOZEL profile HS 22 cover

Basic info

KOZEL profile is designed for mounting in drywall. It makes a LED fixture that creates a line of light in wall and ceiling surfaces with no aluminum parts showing. KOZEL profile can be fixed in slots made in previously fitted drywall using gypsum adhesive (GS 20 CEKOL) or mounting adhesive. Before you fix the profile in drywall, you should take care to lead the power cables out. They can be led in the profile by cutting a hole in the aluminum or end cap. After the glue dries, cover aluminum collars thinly with a suitable adhesive, put the drywall mesh on, fill all and when dry, polish it in such a way that it does not affect the base edge of the profile. Finally, apply paint over the base edge of the profile.
