

BOX profile

Basic info

Box Extrusion consists of two profiles: the "U" Box which is its body and the "Z" Box which locks the extrusion. The "Z" Box is easily assembled to the "U" Box by snapping it in together. If there is any need to use a substantially long body and a lid, beside end caps, circular rods 4 mm in diameter additionally secure the whole construction.

Technical parameters

IP degree	20 IP
Material	anodized aluminium
Length	1m, 2m, can be cutted on customer's order
