

TAN anodized profile

Basic info

TAN-C5 profile is the economical equivalent of a standard 45-ALU profile. The cover designed for TAN-C5 profile is mounted by the "click" or slid into the profile from the side. Its surface has a soft satin structure. The profile can be equipped with end caps in the economical version, white and without holes for a cable. Inserted end caps on both ends of the profile take 16 mm of the cover (8mm each).
