

TOST anodized profile

Basic info

TOST profile is the economical equivalent of a standard STOS profile. This profile is equipped with grooves for mounting, designed for screws, adhesive or springs. The cover designed for TOST profile is mounted by the "click" or slid into the profile from the side. Its surface has a soft satin structure. The profile can be equipped with end caps in the economical version, white and without holes for a cable. Inserted end caps on both ends of the profile take 16 mm of the cover (8mm each).
