

## Micro switch 12V, 24V

### Basic info

Micro switch for profiles-holders. Micro Switch is designed to be used in LED, linear fixtures. It is dedicated for switching LED lights on/off with the use of a button. The bottom of the Micro switch has double-sided, adhesive tape. Do not bend the base of proximity switch as it may damage the device. Switching the main power on/off will cause the lit LED fixtures operated by the proximity switch to be turned "off".

Micro switch is designed for mounting to fixtures mounted especially (but not only) under cabinets, shelves as well as well in sconces, portable LED lamps, desks lamps and floor lamps.

## Technical parameters

IP degree	0 IP
Remote Control Type	micro switch
Type	1 channel
Dimension	43 x 10,5 x 9,5 mm
Current	4A
Voltage	12V ~ 24V DC
